## Value

Ownership of a motor car is but a means to an end—and that end is Service. All other considerations are of minor importance. Consequently, Service is the element that actually determines Value.

When we assert that Maxwell Motor Cars represent an exceeding value, we base that statement on concrete and indisputable evidence of a service record that stands unparalleled.

Being a matter of vital consequence to you, we again refer to this fact: that a stock Maxwell car conclusively proved its worth by traveling 500 miles a day for forty-four consecutive days and nights—without a motor stop—without motor repairs or readjustments—averaging 21.88 miles per gallon of gasoline.

The World's Motor Non-Stop Mileage Record, established in January, 1916, by a Maxwell Touring Car is authenticated by the American Automobile Association. It is not open to question.

Facts outweigh opinions. Knowing the facts, your own judgment must suggest a motor car purchase that will be an investment for, rather than a mortgage against, the future.

The prices, including Full Equipment, are: Touring Car, \$655; Roadster, \$635. One Chassis, three other Body Styles.

Ask for demonstration. Phone 172.
